	I-3 SINUM INSTALLATION CONTROLLER WITH OPENTHERM (3 MIXING VALVE ACTUATORS + SOLAR INSTALLATION) Possibility of control heating device with OpenTherm, smooth control of the three mixing valves, three mixing valve pumps, DHW pump control, two configurable voltage-free outputs, two configurable voltage outputs, maintenance simply solar installation, return water temperature protection. Weather-based and week-based regulation. Possibility of connecting three room regulators with standard communication (two-state, on/off). Possibility of connecting room regulator with RS communication (overview and edition of temperatures from main controller). The possibility of controlling two valves by means of additional i-1, i-1m modules. the possibility of connecting EU-505 Ethernet/EU-Wi-Fi RS modules, 2 outputs 0-10 V, PWM signal. Dedicated software for Sinum

	<p>R-KL2 ROOM CONTROLLER FOR FAN COIL UNIT WITH WIRELESS COMMUNICATION TO SINUM CONTROL PANEL (FLUSH-MOUNT INSTALLATION)</p> <p>Functions: Room temperature control, air humidity measurement, heating/cooling function, control of 3 relays responsible for the operation of the fan coil unit (I, II, and III speed). LCD screen without backlighting. Wireless communication with the Sinum control panel. From the Sinum control panel, parameters such as: operating mode (heating/cooling/off), set temperature, minimum/maximum set temperature, hysteresis for each speed individually, current status of each relay, and turning the time overlay on/off can be read/changed. The controller can operate independently.</p> <p>Equipment: LCD display without backlighting, mechanical buttons, regulator power supply 230V AC, wireless communication TECH WTP 868 MHz.</p>
