	R-KL2 ROOM CONTROLLER FOR FAN COIL UNIT WITH WIRELESS COMMUNICATION TO SINUM CONTROL PANEL (FLUSH-MOUNT INSTALLATION) Functions: Room temperature control, air humidity measurement, heating/cooling function, control of 3 relays responsible for the operation of the fan coil unit (I, II, and III speed). LCD screen without backlighting. Wireless communication with the Sinum control panel. From the Sinum control panel, parameters such as: operating mode (heating/cooling/off), set temperature, minimum/maximum set temperature, hysteresis for each speed individually, current status of each relay, and turning the time overlay on/off can be read/changed. The controller can operate independently. Equipment: LCD display without backlighting, mechanical buttons, regulator power supply 230V AC, wireless communication TECH WTP 868 MHz.				
Name	Communication	EAN code	Catalogue number	Colour	Price

	KL-01 230 MODBUS DEDICATED FAN COIL UNIT CONTROL PANEL Functions: The device is designed to control the operation of a fan coil unit. Operation of the module can be managed via MODBUS or through the SINUM application using TECH WTP. The controller supports both 2-pipe and 4-pipe systems. The module controls the fan and valves using a 0–10V signal or 230V voltage. The control method for the connected device must be selected in the SINUM application or via the P-KL1 / P-KL3 panel. Software updates for the module can ONLY be performed via the USB port. The module can work with both wired and wireless window opening sensors. Power supply: 230V AC. The module cannot operate independently.
